

Assessment 2 Information

Subject Code:	DATA4500		
Subject Name:	Marketing and Social Media Analytics		
Assessment Title:	Influencers and Social Media Markers		
Assessment Type:	Report		
Assessment Length:	1,500	Words	(+/-10%)
Weighting:	30 %		
Total Marks:	30		
Submission:	Turnitin on MyKBS		
Due Date:	Tuesday 19.55 AEST in Week 9		

Your Task

- This assessment is to be done individually.
- You are to write a 1,500-word report (not including the Appendix) about Influencers and Social Media Markers and submit it as a Microsoft Word file via the **Turnitin portal on Tuesday 19.55 AEST in Week 9**
- You will receive marks for content, original thinking, sound usage of Generative Artificial Intelligence (GenAI), recommendations made that are specifically tailored to the case study that your facilitator assigns to your class, appropriate structure and referencing.

Assessment Description

This assessment refers to the following subject learning outcomes:

LO3: Apply a range of social media analytics techniques

LO4: Analyse and communicate data-driven insights and recommendations derived from marketing and social media analytics to diverse stakeholders

Background

You are the Digital Marketing Officer in charge of picking a social media influencer to be the face of a marketing campaign, designed by you with the assistance of GenAI tools, for your organisation, which will be assigned to you by your facilitator.

Assessment Instructions

You have been asked to write a report on (1) your chosen influencer for the organisation assigned to you, (2) the criteria you used in selecting this influencer and (3) a marketing campaign, developed initially with the assistance of GenAI tools and further refined by your original thinking into a final version, that the organisation will use the influencer in to achieve a desired business outcome.

- As part of your research and decision-making process, you must gather and analyse various social media data, which can include (this list is not exhaustive):
 - Follower reach
 - Audience type (real people, influencers, and non-engaged)
 - Demographics
 - Likes-to-comments ratio
 - Brand mentions
 - Engagement rates
 - Competitors' use of influencers
- You **MUST** use GenAI tools, such as ChatGPT and DALL-E, to develop an initial marketing campaign that your organisation will use your recommended influencer for and document your usage of GenAI tools in the Appendix of your report
- You **MUST** make three changes to the initial marketing campaign that the GenAI tools you used returned to you, and justify why you chose to make these specific changes towards the final marketing campaign

Your report should include the following:

- An executive summary containing the most important insights from your report (part of the 5-points total awarded for Body, Structure and Referencing)
- What criteria were used, and why these specifically, in determining whom to consider approaching to become an influencer for the organisation assigned to you (5 points)
- What social media data were accessed and analysed that led to your selection of an influencer (5 points)
- An initial marketing campaign, created by GenAI tools that you prompted
- Three changes you have made to the initial marketing campaign that the GenAI tools returned to you, with justification of why you chose these specific parts of the initial marketing campaign to change, and what actual changes you have implemented to make the final marketing campaign more relevant to the organisation and the influencer (5 points in total for all components of the marketing campaign)
- An Appendix containing the prompts given to, and responses received back from, the GenAI tools that you used in generating the initial marketing campaign (10 points)
- A list of at least ten references in Harvard format at the end of your report (part of the 5 points awarded for Body, Structure and Referencing)

Note that if you do not use GenAI tools to create an initial marketing campaign, or if you do not make any changes to the initial marketing campaign to formulate the final marketing campaign, you will receive 0/30 on this assessment.

Below is guidance on how to document your Generative AI interactions in the Appendix:

In your submission, include an Appendix, not counted towards the word limit, with:

- All your prompts
- The responses from Generative AI
- Brief explanation (100 words) of how you used/modified the AI insights

An example of the structure for this appendix is shown below:

Appendix - Generative AI Interactions

Format Guidelines:

- Document each significant AI interaction
- Number each interaction sequentially
- Include your reasoning for each prompt
- Explain how you used the insights in your report

Example Layout:

Interaction 1: Creating an initial marketing campaign

Purpose: Generate campaign ideas and the marketing mix for the influencer that I have chosen for my organisation

Prompt Used: [Insert your prompt]

AI Response: [Insert complete AI response]

How I Used This Information: I used this response to give me ideas of what campaigns I should consider for my influencer. I then thought about which idea was the best fit for my chosen influencer and organisation...

- ...
- ...

Interaction 2: Generating creative content

Purpose: To make advertisements in support of the marketing campaign

Prompt Used: [Insert your prompt]

AI Response: [Insert complete AI response]

How I Used This Information: I used this response to show examples of the kinds of posters that the organisation could use for this campaign...

- ...
- ...

Appropriate use of GenAI

Usage of Generative Artificial Intelligence (GenAI) is required for this assessment, as it is now a necessary skill in jobs involved with the development of analytics-based marketing and social media campaigns. You must use GenAI tools as detailed above, and you must provide the prompts and responses from your interactions with GenAI in the Appendix at the end of your report.

Important Study Information

Academic Integrity and Conduct Policy

<https://www.kbs.edu.au/admissions/forms-and-policies>

KBS values academic integrity. All students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the Academic Integrity and Conduct Policy.

Please read the policy to learn the answers to these questions:

- What is academic integrity and misconduct?
- What are the penalties for academic misconduct?
- How can I appeal my grade?

English language requirements

All KBS assessments must be submitted or delivered in English only.

Late submission of assignments (within the Assessment Policy)

<https://www.kbs.edu.au/admissions/forms-and-policies>

The table below details the penalties for late submission of the written report due in Week 9:

Number of days late	Penalty
1* - 9 days	5% per day for each calendar day late deducted from the total marks available.
10 - 14 days	50% deducted from the total marks available.
After 14 days	Assignments submitted more than 14 calendar days after the due date will not be accepted and the student will receive a mark of zero for the assignment(s) unless special consideration, reasonable adjustment or an alternative factor related to compassionate circumstances is approved and applied.

**Assignments submitted at any stage within the first 24 hours after the deadline will be considered to be one day late and therefore subject to the associated penalty.*

Length Limits for Assessments

Penalties may be applied for assessment submissions that exceed prescribed limits.

Study Assistance

Students may seek study assistance from their local Academic Learning Advisor or refer to the resources on the [MyKBS Academic Success Centre](#) page. Further details can be accessed at <https://elearning.kbs.edu.au/course/view.php?id=1481>

Generative AI Traffic Lights

Please see the level of Generative AI that this assessment has been designed to accept:

This assessment is Level 3, as detailed in the table below.

Traffic Light	Amount of Generative Artificial Intelligence (GenerativeAI) usage	Evidence Required	This assessment (✓)
Level 1	<u>Prohibited:</u> No GenerativeAI allowed This assessment showcases your individual knowledge, skills and/or personal experiences in the absence of Generative AI support.	The use of generative AI is prohibited for this assessment and may potentially result in penalties for academic misconduct, including but not limited to a mark of zero for the assessment.	
Level 2	<u>Optional:</u> You may use GenerativeAI for research and content generation that is appropriately referenced. <i>See assessment instructions for details</i> This assessment allows you to engage with Generative AI as a means of expanding your understanding, creativity, and idea generation in the research phase of your assessment and to produce content that enhances your assessment. I.e., images. You do not have to use it.	The use of GenAI is optional for this assessment. Your collaboration with GenerativeAI must be clearly referenced just as you would reference any other resource type used. Click on the link below to learn how to reference GenerativeAI. https://library.kaplan.edu.au/referencing-other-sources/referencing-other-sources-generative-ai In addition, you must include an appendix that documents your GenerativeAI collaboration including all prompts and responses used for the assessment. Unapproved use of generative AI as per assessment details during the content generation parts of your assessment may potentially result in penalties for academic misconduct, including but not limited to a mark of zero for the assessment. Ensure you follow the specific assessment instructions in the section above.	
Level 3	<u>Compulsory:</u> You must use GenerativeAI to complete your assessment <i>See assessment instruction for details</i> This assessment fully integrates Generative AI, allowing you to harness the technology's full potential in collaboration with your own expertise. Always check your assessment instructions carefully as there may still be limitations on what constitutes acceptable use, and these may be specific to each assessment.	You will be taught how to use generative AI and assessed on its use. Your collaboration with GenerativeAI must be clearly referenced just as you would reference any other resource type used. Click on the link below to learn how to reference GenerativeAI. https://library.kaplan.edu.au/referencing-other-sources/referencing-other-sources-generative-ai In addition, you must include an appendix that documents your GenerativeAI collaboration including all prompts and responses used for the assessment. Unapproved use of generative AI as per assessment details during the content generation parts of your assessment may potentially result in penalties for academic misconduct, including but not limited to a mark of zero for the assessment. Ensure you follow the specific assessment instructions in the section above.	✓

Assessment Marking Guide

Criteria	Fail (0–49%)	Pass (50–64%)	Credit (65–74%)	Distinction (75–84%)	High Distinction (85–100%)
Executive Summary, Report Structure and Referencing (5 marks)	Fails to synthesise key insights; report lacks coherence and academic rigour; referencing is inaccurate or missing.	Communicates a basic summary of insights; report demonstrates limited organisation; referencing is partially accurate with minimal integration of scholarly sources.	Synthesises main points with general clarity; report is logically structured; referencing is mostly accurate with appropriate source use.	Effectively synthesises and communicates insights; report is well-structured with coherent flow; references are relevant and accurately applied.	Critically synthesises insights into a comprehensive executive summary; expertly structured report; demonstrates advanced academic rigour through impeccable referencing and integration of high-quality scholarly sources.
Development and Justification of Influencer Selection Criteria (5 marks)	Fails to define or justify relevant selection criteria; lacks analytical grounding.	Identifies basic selection criteria with limited analytical justification or strategic alignment.	Develops and applies relevant selection criteria; demonstrates moderate analytical reasoning.	Applies advanced understanding to justify selection criteria; links decisions to organisational and strategic contexts.	Critically evaluates and synthesises criteria; formulates nuanced, evidence-based justifications aligned with strategic marketing objectives.
Application of Social Media Analytics to Influencer Selection (5 marks)	Demonstrates little to no application of social media analytics; analysis lacks relevance or rigour.	Applies basic social media data; limited analysis with superficial justification.	Applies appropriate social media analytics techniques; supports influencer choice with moderate insight.	Applies and analyses relevant social media data; demonstrates sound decision-making with clear analytical justification.	Demonstrates advanced application of multiple analytics techniques; critically evaluates and synthesises data to generate strategic, actionable insights.
Formulation and Refinement of GenAI-Supported Marketing Campaign (5 marks)	Marketing campaign is underdeveloped; lacks originality or misuses GenAI tools; changes are unjustified.	Constructs a basic campaign with limited application of GenAI tools; changes are evident but weakly rationalised.	Formulates a clear campaign using GenAI; demonstrates understanding of marketing aims; three changes are justified with supporting rationale.	Effectively formulates and refines a campaign using GenAI; changes are strategic and well-justified.	Demonstrates exceptional originality and critical synthesis in formulating and refining the campaign using GenAI; changes are deeply insightful and enhance campaign effectiveness.

Documentation and Reflection on Use of GenAI Tools (10 marks)	Fails to document or reflect on GenAI use; appendix is incomplete or irrelevant.	Appendix includes basic prompts and outputs; lacks clarity or meaningful reflection.	Documents relevant GenAI prompts and outputs; provides basic rationale for tool usage.	Clearly documents and analyses the use of GenAI tools; shows understanding of their application in campaign development.	Critically evaluates and synthesises GenAI interactions; appendix demonstrates advanced skill, strategic reflection, and depth in tool application.
